Processing Closings

Property training. What to do when a closing arrives from a broker, with a flow for each pathway.

Closing Property

Step 1: A closing arrives

Pathway A: already bound

1 Upload and sort the email

Placing document into the OneDrive file. Email into its correct email folder. Make sure the files are already in bound.

2 Check the closing

On UW WS, TAI tab. See slide 4.

Closing, dates and insured name match?

Yes

3 Schedule and COC issued?

If not, issue them now. See slide 5.

4 File everything

All aspects into the email folders and OneDrive, including the documents.

No

Notify the UW

They contact the broker.

Already bound means

A policy number, or the docs have been issued.

Checking the closing on UW WS

1 Open UW WS for the file.

2 Go to the TAI tab.

3 In cells D44 to D53, enter the closing amounts into the blue cells.

4 Also check the dates and the insured name match.

What the closing might call each levy

Levy	May also be called
FSL	FENZ, Fire & Emergency Levy, Fire Service Levy
NHI	Natural disaster levy

Everything matches?

Brilliant. Carry on with the pathway.

Something does not match?

Notify the UW to contact the broker.

Schedule and COC

Check these have been issued. Look especially if there is an interested party, or if the broker has requested them.

Schedule

Must be issued.

If one has not been issued, issue it.

COC

Not mandatory, but good practice.

Issue it while you are downloading documents, so you do not have to go back later.

Pathway B: NB / RN, check the closing

1 Open UW WS
Open the file.

2 TAI tab
Go to the TAI tab.

3 Enter the closing amounts
In cells D44 to D53, into the blue cells. Levy names are on slide 4.

Closing, dates and insured name match?

Yes

The closing matches
Brilliant.

Also check
The dates match, and the insured name is the same.

No

Notify the UW
They contact the broker.

Either way, it is not bound yet
Next: generate the policy number and bind it. See slide 7.

Pathway B: NB / RN, bind it

Step 1

Generate the policy number

On the policy register, tab 'Social Housing 2025 - 26'. Follow the policy number generation workflow.

Step 2

Enter it in the TAI tab

Put the policy number in cell C19. It fills in on the Schedules and the COCs.

Step 3

Print and send

Print the Schedules and COC. Send them to the UW to send to the client.

Step 4

Check the BDX tab

The certificate reference has the policy number, and cells E3 to AE3 are all filled in.

Step 5

Move the files to bound

Both the OneDrive files and the emails.

Step 6

Upload the closing file

To the correct email folder and the correct OneDrive folder.

Do this whether or not the closing matched. It has not been bound yet.

Pathway C: LL, check the closing

1 Open UW WS
Open the file.

2 LL Quote page
Use the same policy type that was bound: Protect, Protect+ or Protect Prime.

3 Check the closings match
Cells E61 to E69 are where you check the closing amounts match.

Closing, dates and insured name match?

Yes

The closing matches
Brilliant.

Also check
The dates align, and the insured name is the same on both documents.

No

Notify the UW
They contact the broker.

Either way, it is not bound yet
Next: generate the policy number and bind it. See slide 9.

Pathway C: LL, bind it

Step 1

Generate the policy number

On the policy register, tab 'Social Housing 2025 – 26'. Follow the policy number generation workflow.

Step 2

Enter it in the TAI tab

Put the policy number in cell D19. It fills in on the Schedule. No COC is issued for LL policies.

Step 3

Print and send

Print the Schedule. Send it to the UW to send to the client.

Step 4

BDX tab, by hand

For LL policies the BDX is entered manually. See slide 10 for the fields.

Step 5

Move the files to bound

Both the OneDrive files and the emails.

Step 6

Upload the closing file

To the correct email folder and the correct OneDrive folder.

Do this whether or not the closing matched. It has not been bound yet.

LL: entering the BDX by hand

Use a new line. The lines above are pre-populated, and a house policy added afterwards would mess up the formatting.

Fields to enter

- Gross premium (see the table)
- Address, insured name, risk type and so on
- SI (see the table)
- IWL fee: $100 for LL
- FSL: matching the quote
- NHI: does not apply to LL

Premium and SI by policy type

Policy type	Gross premium	SI
Protect	$397.18	$25,000
Protect+	$470.00	$50,000
Protect Prime	$765.66	$75,000

IWL fee: $100

The UW fee for LL is $100.

Things to watch for

Rothbury closings

Rothbury put the UW fee in a different spot on the PDF.

The main summary at the top is missing $120 + $18. The rest is a couple of pages below.

LL policies

An LL policy does not have NHI cover, so there is no NHI fee.

No COC is issued for LL policies either.

The three pathways side by side

	A: Already bound	B: Not bound, NB / RN	C: Not bound, LL
Check on	UW WS, TAI tab, D44 to D53	UW WS, TAI tab, D44 to D53	UW WS, LL Quote page, E61 to E69
Policy number	Already issued	Generate on the policy register, enter in TAI tab C19	Generate on the policy register, enter in TAI tab D19
Documents	Issue a schedule if missing. COC is good practice	Print Schedules and COC, send to the UW	Print the Schedule, send to the UW. No COC
BDX tab	Not part of this flow	Check the certificate reference and cells E3 to AE3	Enter by hand on a new line
Levies	FSL and NHI	FSL and NHI	FSL only, no NHI for LL
No match?	Notify the UW	Notify the UW	Notify the UW
